

Lambro Meridionale River. MILANO/PAVIA

RESULTS OF C.A.L.Me PROJECT

River restoration through participation tools

During the field trip several examples of restoration ecology along the *Lambro Meridionale* river will be shown, among Milano and Pavia provinces.

The project consisted both in the realization of hedgerows, riparian wooded strips, ponds for amphibians, and in the restoration of existing woods, meadows and oxbows. The field trip will stop mainly in 3 municipalities: Pieve Emanuele, Torrevecchia Pia and Villanterio, where the most part of the green infrastructures have been realized.

DESTINATION Pieve Emanuele (MI), Torrevecchia Pia (PV) and Villanterio (PV)

DATE Wednesday July 3rd, 2019
