

Environmental and Sustainability Indicators

In July 2019, the [International Association for Landscape Ecology \(IALE\)](#), will be hosting its tenth world congress in Milan, Italy.

Environmental and Sustainability Indicators invite landscape ecologists to submit contributions for a special issue titled:

Landscape Indicators for Sustainability

We extend the call to those working within the field of research, who may not have necessarily attended a specific symposium.

This themed issue aims to cover:

1. the state of the art of landscape research and application in terrestrial and aquatic landscape management;
2. descriptions and comparisons of landscape methodologies to environmental assessment;
3. illustrating the potential of landscape approach in long term monitoring schemes, with a focus on climate change, landscape transformation, and biodiversity decline;
4. highlighting the debate around applications of landscape approaches to support policy and management actions.

Guest editor: Almo Farina (almo.farina@uniurb.it) & Emilio Padoa-Schioppa (emilio.padoaschioppa@unimib.it)

Click on the options below to read our Instructions for Authors and the Aims and Scope of *Environmental and Sustainability Indicators*. In the cover of the submission letter please refer to this special issue.

Dead line for submission: 30 september 2019
